

## PENIS ENLARGEMENT 3 : BABY OIL

Provide the basic materials as listed in the following table.

For 100g Production			
No	Ingredients	Weight (g)	Role
1	Mineral oil	98	Carrier oil
2	Fragrance	1	Additive / Perfume
3	Vitamin E (Tocopheryl acetate)	1	Additive / Skin Health

### Note.

Baby oil provides excellent lubrication to prevent skin friction. You can enhance its benefits by adding fragrance and vitamin E for skin health.

Always use cosmetic grade mineral oil for production.

### How to make it.

In the laboratory, prepare an overhead stirrer, beaker, and other necessary equipment.

1. Add 98g of cosmetic grade oil and start stirring.
2. Add the additive if needed (colorant and fragrance). Stir until completely blended.
